TYPICAL ROOM PLAN EXAMPLES

Space for your room plan

If space is very tight, there are several things we can do to aid installation, as long as we know in advance. Therefore a good starting point would be to use the form and let us help you through the room planning process.
Please take measurements from skirting board to skirting board, where relevant (ideally in metric) and also indicate the position of the door, window, radiator and any other features etc.
The following information can also be useful where space is tight;

Socket Positions:	Mark position on plan XX plus height from floor to top of socket
Skirting boards:	Height and depth
Radiator Position:	Projection from the wall
