

# Majestic StudyBed

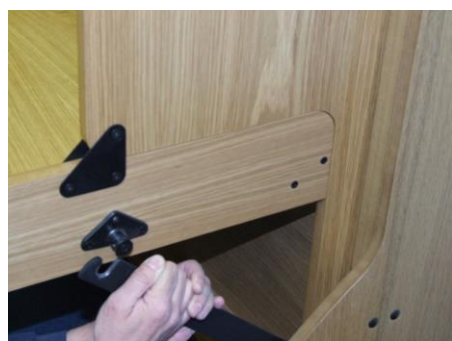

2 people required

Wall fixings must be carried out by a competent expert

Please call 01844 214484 if in doubt of procedure

## Dismantle Instructions

1. Put into desk mode and engage the locks
2. Hold the mechanism arm at the side of the desk. Pull down and outwards to disengage them from the desk sides.

They are held in position by the tension in the gas struts however they will move with firm handling and you may find it easier if you sit on the floor in front of the arm and pull it firmly down. In addition, you could brace a foot against the outer frame for extra purchase.

N.B. picture shows the StudyBed model but the method is exactly the same for the Majestic.

3. Using a 4mm hex bit, remove the desk support bolts from the inside face of one desk side and from the outside of the other. Remove the desk sideward.
4. Holding the bedframe in place, disengage the locks (it will be heavy now) and carefully lower the bedframe to the floor.
5. Unscrew the bed cover panels and remove the bed covers.
6. Using a 10mm allen key, unscrew the main pivot bolts and remove.
7. Slide the bed frame forwards away from the body sides and remove the screws using a 4mm allen key to dismantle the bed frame.
8. Remove the 2 covers (8 wood screws) to expose the wall fixings. Remove the wall fixing screws taking care to ensure the bed frame is stable and doesn't fall forwards.
9. Lower the main frame to the floor and remove screws to dismantle.

## **Re Assembly Instructions**

- 1.** Rebuild the body structure on its back and then raise and position in desired location on the wall.
- 2.** Fix to wall with a minimum of 4 brackets, ensuring a solid and stable fit to both the wall and the Majestic body frame. Re fit the fixing cover boards.
- 3.** Assemble the bed section and slide into the body structure, attach using 10mm bolts.
- 4.** Attach the 2 bed covers.
- 5.** Raise the bed and lock the catches.
- 6.** Attach the desk.
- 7.** Pull down the mechanism levers each side to attach to desk... keep fingers out of the way.
